

# North American Concrete Alliance

---

December 4, 2017

The Honorable Bill Shuster  
Chairman  
Committee on Transportation and Infrastructure  
2165 Rayburn House Office Building  
Washington, DC 20515

The Honorable Peter DeFazio  
Ranking Member  
Committee on Transportation and Infrastructure  
2165 Rayburn House Office Building  
Washington, DC 20515

Chairman Shuster and Ranking Member DeFazio,

Members of the North American Concrete Alliance (NACA) are encouraged that the House Committee on Transportation and Infrastructure is continuing its commitment to examining and addressing the challenges facing America's communities that are impacted by disasters of all kinds.

In particular, NACA is supportive of H.R. 4460, the Disaster Recovery Reform Act and the emphasis the legislation places on pre-disaster planning and mitigation by incentivizing communities to build and rebuild to better resist disasters of all kinds. This bill also works to make sure that taxpayer dollars are spent wisely, and in a way that will leave communities more resilient to future disasters. By encouraging rebuilding with modern, enhanced building codes this bill will allow for better protection of life and property, as well as, place fewer burdens on local services and provide for a more stable local economy.

NACA is a coalition of concrete-related associations dedicated to addressing industry-wide priorities in the areas of research, education and government affairs. NACA places an emphasis on advocating for increased and efficient federal investment in surface transportation and infrastructure funding. As the Committee moves forward on implementing policies to improve the nation's post-disaster infrastructure we encourage you think boldly and look towards the future.

By making these tough decisions now, you will be able to help future community's better resist disasters and reduce the potential financial impact should a disaster occur. Now is the time to make the investments that will pay dividends for tomorrow and beyond.

NACA looks forward to working with you to address our nation's disaster recovery needs now and in the future.

Respectfully,

American Concrete Pavement Association  
American Concrete Pipe Association  
American Concrete Pressure Pipe Association  
American Concrete Pumping Association  
Concrete Reinforcing Steel Institute  
Tilt-Up Concrete Association
