ACPA Technical Team Influences Multiple Concrete Projects and Opportunities in Q2

ACPA’s engineering staff delivers consultation, specification interpretation, education, and other technical services to ACPA members, state and federal agencies, as well as Chapter/State partners. These activities generate industry opportunities resulting in millions of dollars saved by members avoiding unwarranted penalties and pavement removal. The following summary is a snapshot of work performed during the second quarter of 2022.

Airport Market
ACPA provided assistance to contractors and guidance to engineers and agencies, which has resulted in potential member cost savings and opportunities totaling more than $500,000.

Airport Market
ACPA's efforts have resulted in contractor savings of up to $700,000 for Q2 (not including advocacy efforts at the federal and state agency levels, which create and preserve market opportunities for the industry).

Direct Agency Assistance
ACPA’s expertise allows concerns to be addressed before they become problems, making it easier for agencies to choose concrete! Assistance also extends to contractors and suppliers by advocating for constructible designs and improved specifications. The concrete pavement industry in general also benefits, as ACPA expertise helps ensure concrete pavement construction goes smoothly and pavements perform to expectations, which facilitates market growth.

Chapter/State Affiliate Support
ACPA staff provides training/education and extensive support to the Chapter/State partners, specifically to state/federal DOT officials. The work translates to professional development, continuing education, and market promotion. In addition, staff lends expertise to the CP Tech Center and member organizations.
Airport Market

ACPA provided assistance to contractors and guidance to engineers and agencies that has resulted in potential member cost savings and opportunities totaling more than $500,000.

Beneficiaries of ACPA Efforts During Q2

- FAA Central Region Airport
- FAA Great Lakes Region Airport
- FAA Eastern Region Airport
- Eastern U.S. Marine Corps Air Station
- Two FAA Southwest Region Airports
- Two FAA Southern Region Airports
ACPA’s efforts have resulted in contractor savings of roughly $700,000 for Q2 (not including advocacy efforts at the federal and state agency levels, which create and preserve market opportunities for the industry).
**Direct Agency Assistance**

ACPA's expertise allows concerns to be addressed before they become problems, making it easier for agencies to choose concrete! Assistance also extends to contractors and suppliers by advocating for constructible designs and improved specifications. The concrete pavement industry in general also benefits, as ACPA expertise helps ensure concrete pavement construction goes smoothly and pavements perform to expectations, which facilitates market growth.

**Beneficiaries of ACPA Efforts During Q2**

- Northwest Department of Transportation
- Grand Forks, North Dakota
- Central U.S. Air Force Base
- FAA Southern Region Airport
- Northeast Department of Transportation
- Two FAA Test Centers
- Two Southwestern Departments of Transportation
- Southeast Department of Transportation
- FAA Test Center
- Two FAA Headquarters
- Western Department of Transportation
Chapter/State Affiliate Support

ACPA staff provides training/education and extensive support to the Chapter/State partners, specifically to state/federal DOT officials. The work translates to professional development, continuing education, and market promotion. In addition, staff lends expertise to the CP Tech Center and member organizations.

Additional Industry Support Includes:
- FAA/National
- Great Lakes Region Airport
- Southwest DOT
